Company Summary

Superior Stainless are a multi-disciplinary fabrication workshop offering tailored services across many industry sectors including:

Oil & Gas
Food & Beverage
Dairy
Marine
Transport
Stock Feed Industry

Stainless Steel benching and handrails for Commercial / Domestic markets

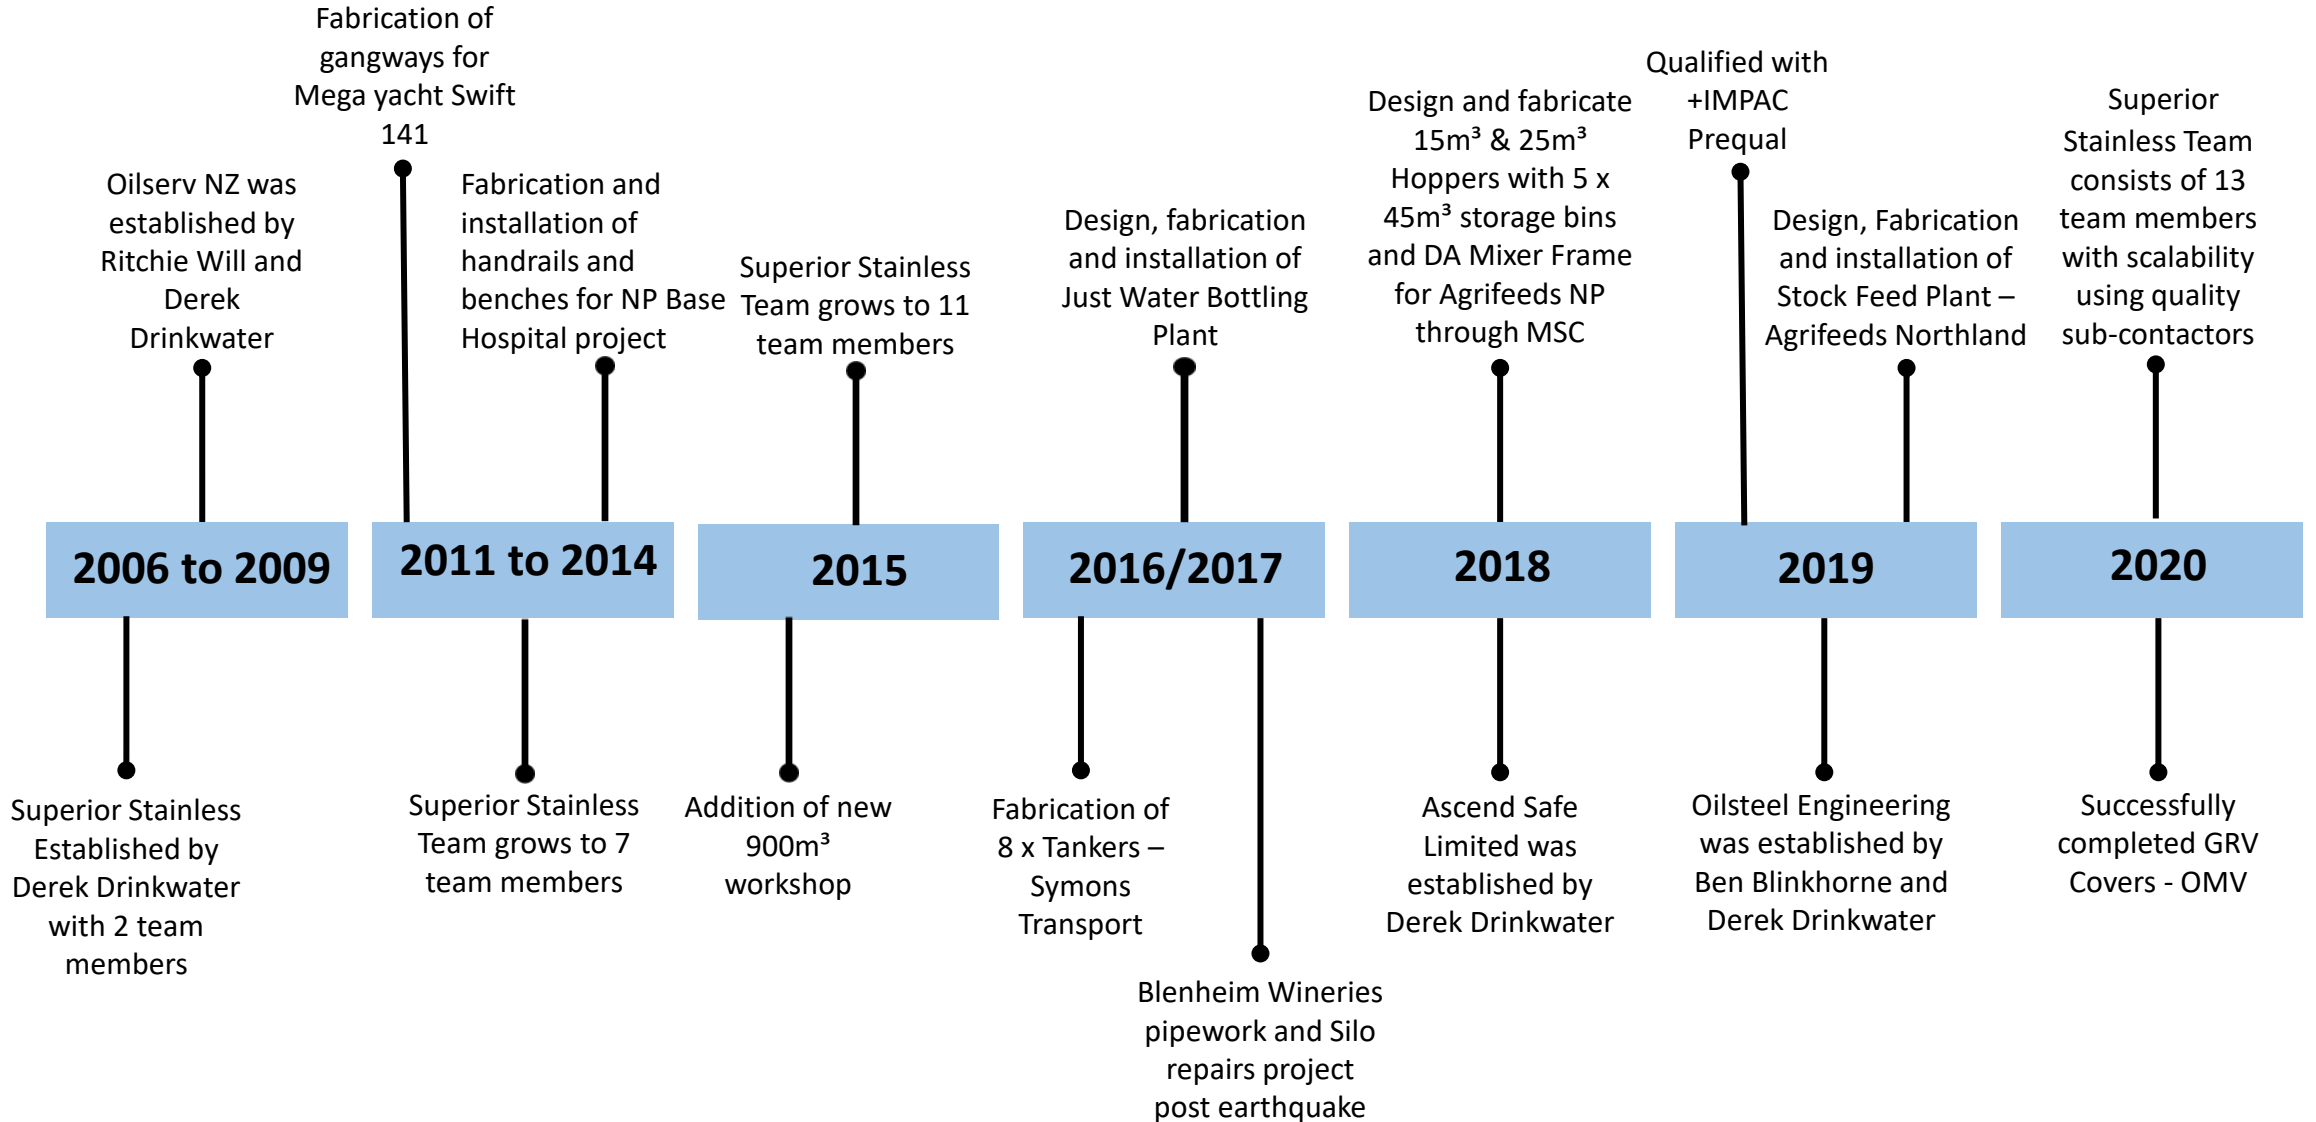

Committed to customer service developed since 2006, we deliver bespoke solutions which make a difference to the sectors we serve and to our customers.

Superior Stainless are leaders in providing metal fabrications which are designed and created to our customers' specifications. Our success has grown from our ability to combine skillsets and ensures our work is practical, sustainable and cost-effective while maintaining our core values of Safety, Integrity, Excellence and Innovation.

Drawing upon a depth of expertise to understand how we can add value to existing and new ideas, our point of difference is our people. We can manage any project from concept and design through to fabrication and installation all inhouse.

At Superior Stainless, we constantly integrate our services and develop our capabilities based upon our customer needs, which when balanced by use of technology and materials, results in highly creative solutions. We serve clients throughout New Zealand from our modern premises based in New Plymouth.

Our Values

Safety

We are proactive in taking steps to encourage and ensure a culture of safety in all our operations. Taking care of our people is important to us and results in peace of mind across the board - from staff, management, and clients.

Integrity

Integrity is an integral part of our internal and external relationships. We believe that if we are open and honest in our communications and we carry out all operations with integrity, this will be evident in the work that we produce, our company's profitability, and ongoing customer relationships.

Excellence

Integrity leads to excellence. We believe that skilled tradespeople who are dedicated achieve great results and this is the standard that we seek to uphold. We also believe that through using the right systems to control our process, we can ensure consistent quality management.

Innovation

For us, innovation is the way forward. Building on a foundation of integrity and excellence, we make progress as an innovative company. To do that, we must continually assess and improve at every step and we owe it to our clients in endeavoring to offer the smartest solutions.

“Superior Stainless initially worked under a Contractor on a major project for Agrifeeds and soon showed their professionalism with their high-quality workmanship and onsite solutions focused attitudes.

Subsequently Agrifeeds opted to use Superior Stainless as the main contractor for the next major project to which we are extremely happy with the outcome and the follow up service that has been delivered

Derek and his team have a fresh approach and work hard to deliver solutions that best fit their customer’s needs, would highly recommend them for any size project!”
